# who we are

## **Transforming Your Ideas To Life**

NARSUN Studios is a software development company with a major focus on game design, production, and development. We have been working our socks off since 2016 specialising in Unity, Unreal Engine, Virtual Reality and Augmented Reality.

We firmly believe in the fact that every project we take on becomes a part of our brand's image and, commit to finish each project with perfection. We wish to become not only the biggest game development studio in Pakistan but also a major player in our region. We take immense pride in the fact that despite being a young Pakistani company we have had the opportunity to not only work with big names such as NBA, NFL, BBL, Coca Cola but also managed to impress them by our skill and talent.

### Doge Dash

Doge Dash is a single player 2D game. It has Blockchain wallet integration using pancakeswap on Binance (bnb). The goal is simple: dash as quickly as you can across 15 levels while collecting coins. Players who complete all levels are rewarded with the coins they have gathered; which are sent directly to their wallets.
