

Finetune

AI for blade manufacture

Finetune

AI for wind power

Finetune helps leading wind industry players get the most out of their assets through AI based solutions for manufacturing, performance and maintenance optimization.

Finetune Infusion Expert

Finetune Infusion Expert

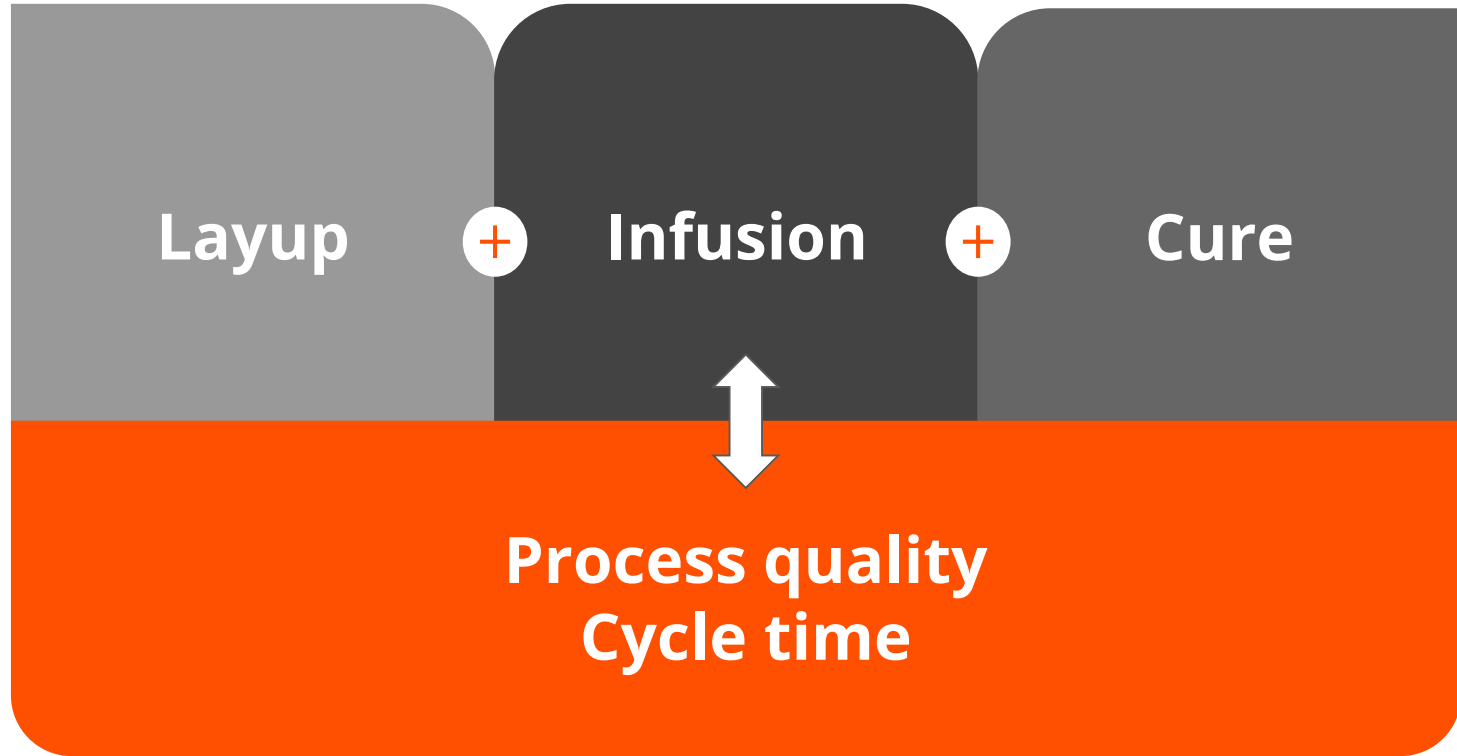

AI Vision

- Log flowfront speed and position
- Detect and warn about: back leak, race tracks
- Log cycle time and time break down of process map

AI Expert

1. Use existing process parameter log (mould SCADA system)
2. Use existing quality and cycle time logs
3. Find the correlation between 1. and 2. by AI mapping
4. Implement new knowledge and observe improvements

AI mapping of Process to quality and cycle time

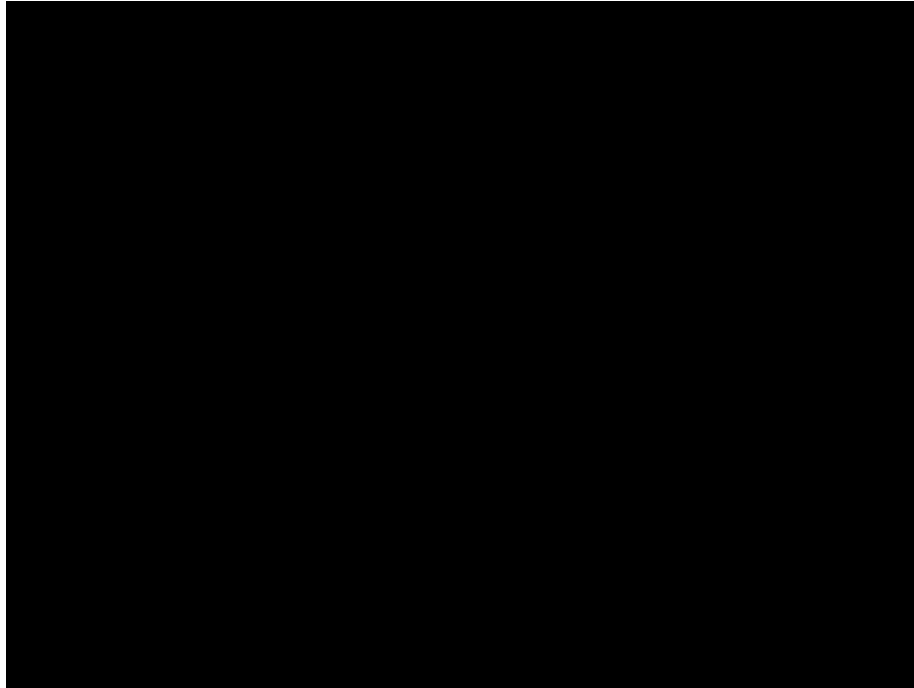

Flow front tracking by AI:

Flow front position and speed

Bag leak detection and alert

Racetrack detection and alert
